v. 152, no. 1, p. 31-36.

DESCRIPTORS: *Polymers, *Plasticizers, Plasticity,
Organic solvents, *Thermonodynamics.

The conception of a thermodynamic equilibrium existing in every plasticized material between solvated and unsolvated plasticizer molecules arose out of previous measurements on plasticized materials. The equilibrium depends on the nature of the high polymeric substance and the plasticizer, on the concentration of the plasticizer, and the temperature. The unsolvated plasticizer molecules are the ones that diffuse, and (over)
